## PROJECTS

### Integrated Clinic Management System

Developed a full-stack web application to streamline clinic operation, focusing on appointment scheduling and patient management information. This system allows clinics to transition from manual processes to electronic health records (EHR), enhancing data accuracy, accessibility, and operational efficiency.

Technologies: JavaScript, React.js, Node.js, MySQL REST API

### WeIT: Online IT Essential Shop

Developed a full-stack e-commerce application specializing in the sale of computer components and IT essentials. The platform enables users to browse products, manage a shopping cart, and complete secure purchases online.

Technologies: HTML/CSS, JavaScript, Node.js, Embedded JavaScript (EJS)

### Hotel and Vacation Rentals System

Developed a desktop-based designed for managing hotel and vacation rental bookings, tailored for travelers seeking convenient browsing, check-in/check-out, and payment processes. The system allows users to explore accomodation, view hotel details, manage reservations and process payment securely.

Programming Language & Toolkit: Java using Java Swing for the graphical user interface.
